Erin – No problem at all. I'm hoping to take my furlough day tomorrow (I was so busy last week I ended up working on Friday), so sometime next week would work. Just send me a couple days/times that work for you.

This was the first year we didn't do any trick or treating. My youngest turned 13 this summer and decided it was more fun to hang with his friends. So now the only costumes I see are the kids coming to the door.

See ya, C.

Hi Cassandra,

I'm sorry to do this, but I need to reschedule the discussion we planned for 1 PM today. Do you have any time to talk tomorrow? If not tomorrow, maybe sometime next week?

I hope all is going well and you had a nice Halloween yesterday.

Erin

Okay, I'm so glad you've got some time. Thursday at 10:00 AM? It shouldn't take too much time. If that doesn't work, I can do 1:00 on Thursday too. I'm out of the office next Friday.

Hope you enjoy your weekend -- it's a beautiful day to be outside!

Glad I could clarify, it's just so crazy I can't even keep it all straight all the time.

Sure, I'm happy to chat sometime. Perhaps we don't have too different a perspective, it may just be lost in translation. I'm off tomorrow on my furlough day, and in SF on Monday. At this point my schedule is wide open on Thrs and Friday. So let me know what works for you.

Thx, C.

This is really helpful, thanks. It's way more clear than mud :).

We probably should talk soon about the overall project purpose for CM1. Too bad we didn't have today's meeting after all! Our agencies have different perspectives and I just want to explain ours to you. I'd be happy to walk over to you or we can talk by phone. We probably still won't agree but hopefully you'll understand our point of view.

Talk to you soon,
Erin

No problem. Give me a call if you want to discuss this issue.

There will most certainly be a new operating scenario for Alternative 4, since the agencies are working together as we speak to develop something that is "permittable". Essentially, once the EIR/S is final and a preferred alternative is selected we will have a project with a defined alignment corridor and an operating scenario for CM 1, and programmatic descriptions of CM 2-22 (I'm not sure if it's still 22 CMs or more now). We will be requesting 404 authorization to implement CM1, and will be developing various alternatives to that project for the 404b1. We will also be doing additional NEPA and permitting for implementation of the restoration identified in the other CMs.

Hope this is clear as mud J

Hi Cassandra,
Thanks for getting back to me so quickly; I really appreciate it. We are discussing the overall project purpose

statement for the delta conveyance project with the Corps. One of the difficulties is that the term "CM1" is being used in the overall project purpose statement but the description isn't complete. Then it is not clear exactly what the Corps is concurring with in the overall project purpose statement that DWR proposed. One of the things I'm curious about is whether or not CM1 will include a scenario for operations that is different from February 2012?

Can you share the description/definition of CM1 with us when it is complete?

Thanks again for your help this morning.
Erin

Erin – They are still updating the description because the agencies are still working out the operations for alternative 4 of CM1. I don't know that the purpose and problem statement descriptions will change much, it will mostly be changes to Alternative 4 in the EIR/S. This alternative will have the new operations and updated facilities (e.g. 3 intakes and gravity flow) from the July announcement.

Thanks, C.

Hey Cassandra,

Thanks for your help. I have the February version from the BDCP website. I was hoping you had a description of CM1 after the July announcement. I appreciate your help,
Thanks,

Erin

Erin – No problem. I've asked Jessica to pull out the descriptions from the BDCP and the BDCP EIR/S. She's going to send you descriptions from the February version, but we will see if we can follow-up with something more recent, since there have been changes to the operating scenarios for CM 1.

Thx, C.

Hey Cassandra,

Do you have a written description/definition of conservation measure 1 that you can share with me?

I hope all is going well,

Erin
